

We provide an affordable option for everyone.

At Lashforever Canada, **we understand the time and investment** it takes to provide a quality enhancement and substantial training. We offer our students an affordable option where they can receive the training with our in-class Artliner™ machines & pigments and then decide to purchase a machine after they have completed their training.

Most advanced machines - European made.

We offer Artliner™ machines which are the highest and most advanced machines in the industry exclusive to Lashforever Canada. These machines are top of the line and manufactured in Europe to provide the most precise results. Their pigment collection is the most advanced with a wide range of colours to select from. **We provide quality at a cost that is reasonable and affordable without sacrificing the end result for the client.**

Most extensive & in-depth training.

Head trainer and Owner of Lashforever Canada, Lauren Spencer has been in the semi-permanent and permanent makeup industry for over 10 years. **Our training facility is rated one of the top and most extensive in the industry** and we produce the most highly skilled and knowledgeable students.

We offer financial flexibility.

We give our students the financial flexibility to decide if they want to **purchase a machine before or after their training**. Our students have the option to learn this new innovative enhancement and receive training with our in-class Artliner™ machines prior to purchasing their own machine upfront. For those students who wish to purchase their machine prior to training, they can select from one of our machine packages and receive an exclusive discount. Students who decide to purchase their machine after training have up to 60 days, following their class date to decide on which machine they would like to purchase in order to receive the exclusive machine pricing.

We are the only training facility that provides this unique option, other training facilities require students to pay for the training as well as the machine upfront.

Nano Brow Training Courses By Lashforever Canada

We offer a beginner and advanced course - our training facility provides in-class machines that allow you to perform your training prior to purchasing your machine. **Once you have completed training you can purchase your choice of machine package at our exclusive pricing.**

This is an advanced course for experienced technicians who have 1 year experience and have received certification from a reputable semi-permanent tattooing / microblading facility.

Registration Requirements:

Once you have placed your deposit, registered technicians are required to email their certifications and years of experience to training@lashforevercanada.com in order to be approved to receive advanced training.

IMPORTANT: If you do not meet the requirements for the advanced course your \$500 deposit will be transferred and you will be required to complete the Beginner Course. If you are not sure if you are experienced to take the advanced course please inquire at info@nanobrow.ca.

Advanced Course includes access to in-class training machines and the class pigment collection to be used on practice skin and 2 (two) live models during class. Also included in the course is the "Mini Starter Kit" which provides each student with 5 Nano needles to be used in class on their models and practice pad/skin .

Please Note: This is a generalized outline of the 2 Day Beginner Course, sections are subject to change without notice in order to provide the highest level of training and are made at the discretion of Lashforever Canada.

Nano Brow Training Course Outlines

Model Requirements

All students are required to arrange their own models and schedule a total of 2 (two) models to complete in class. If you are not able to find your 2 (two) models, Lashforever Canada can provide you with 1 (one) model which is subject to a \$100 model fee for students located in the Greater Toronto Area.

Please note: Students may perform and complete only 1 (one) model provided to them for their training in class if the student is unable to find models (fee applicable). You will be required to complete your second model outside of class if you were unable to complete your second model in class. This is not included in the (6) additional models required outside of class to receive your certification.

Greater Toronto Area cities applicable to \$100 model fee:

Halton

- Halton Hills / Milton / Burlington / Oakville

Peel

- Caledon / Brampton / Mississauga

York

- King / Vaughan / Markham / Whitchurch-Stouffville / East Gwillimbury / Georgina / Newmarket / Aurora / Richmond Hill

Durham

- Brock / Uxbridge / Scugog / Pickering / Ajax / Whitby / Oshawa / Clarington

City of Toronto

Students are aware that if they do not schedule 2 models to complete their in-class training they are required to complete any models missed in class on their own time and to be submitted as additional models not included in the required models to receive certification. When placing the deposit, students are aware of the model requirements to complete their in-class training.

Lashforever Canada is only responsible to provide 1 model for in-class training at a model fee of \$100 for students who are located in the Greater Toronto Area. Students who are outside the Greater Toronto Area are required to provide their own models and will have 1 model provided to them at no additional cost if necessary.

Once you have received your training you will have to complete 6 additional models outside of class that are graded and approved by our Certified Nano Brow Trainers. If our trainers request additional photos to be submitted, you will have to complete additional models until you have a total of 6 approved models to receive your certification.
